GARGANO WINTER EXPERIENCE

#WeAreINPUGLIA®

The year 2025 begins with a series of unmissable events organized by the association Dauniatur A.P.S. that thanks to the financing POC PUGLIA FESR - FSE 2014-2020 Axis IV "Environmental protection and promotion of natural and cultural resources"- Action 6.8 "Interventions for the competitive repositioning of tourist destinations" has developed a rich and engaging program that includes guided tours, nature excursions, food and wine tours, bike tours and guided "six-legged" walks accompanied by pets and with the help of a dog guide. The objective is to raise awareness, promote and enhance the territories of Manfredonia, Monte Sant'Angelo, Mattinata, and the heart of the Gargano in the Umbra Forest to involve residents, local visitors and tourists who these days love to spend in the quiet in authentic local traditions a reason for recall and participation.

Seasonal adjustment is aimed at the tourist and economic development of the territory which, to be achieved requires promotion and strong "complicity", in order to address the needs of the community in a systemic and holistic manner according to a destination management logic.

The rich heritage of artistic, landscape and historical assets are a factor that attracts and motivates travel since their testimony contributes to enriching human beings with conceptual values, reconsidering the destination with a view to preserving historical memory and material evidence of the culture and civilization of the place. Food and wine tourism is intrinsic to a unique territorial dimension: possesses the ability to express and synthesize the essence of places and directly and widely involve the local community, determining a strengthening of the sense of belonging to one's own land and one's own traditions.

The result is a varied final product rich in experiences and cultural connotations, a perfect mix of ancient customs and new trends seasoned with solidarity, conviviality and the desire to get together, which will lead the visitor to immerse himself as a protagonist in emotional experiences. Do you want to know more? Come and discover the Gargano Winter Experience events and be inspired.

BIKE EXPERIENCE

We promote cycle tourism in Puglia as a new way of holidaying while respecting the territories and the environment, to rediscover the beauty of parks, small villages and towns rich in culture. Using a bicycle, even on holiday, is the best choice because it allows you to move outdoors and discover the area. Furthermore, cycle tourism is an "activator" of a virtuous circuit that brings people, upon returning from a cycling holiday, to choose the bicycle also for their daily commute, with undoubted advantages for our cities, making them more livable and healthy.

SIX-LEGGED TREKKING

Trekking with your dog is a unique experience that strengthens the bond and allows us to explore nature with a new, superior awareness.

Many studies show that the company of your dog guarantees countless benefits for physical and mental health. Hiking with your dog offers countless benefits for physical and mental health. Hiking with your dog allows the animal to release pent-up energy and tone up physically. A peaceful dog is also a dog with a balanced character, not nervous and frustrated. However, the paths can hide dangers and pitfalls. This is why it is necessary to undertake an educational journey before undertaking this activity.
